## Entertainment Flight Simulator

### OUR OFFER

We are offering a fixed base, fully enclosed flight entertainment device, designed and constructed according to aviation standards. The simulator is modelled on a narrow-body twin jet airliner.

Robust, simple in operation with predefined flight scenarios, imitating in high details the original airplane's features and functionality.

Capable of being operated by non-professional aviators, specially designed for all age customers.

Seamless, wide visualisation with no obstructions in pilot's field of view provides a unique flight experience, magnified by real airplane sound environment.

### KEY FEATURES:

- Multichannel Wraparound Seamless HD Visual System
- Fully enclosed flight deck
- Worldwide airport database
- Conventional Flight Controls
- Almost unlimited weather condition combinations
- Great selection of simulated scenarios
- All panels and instruments fully functional
- Built-in stereo system for simulated sounds (environment, cockpit sounds, callouts, alerts)

Gain more customers  
for your business!

Make them return to you with  
family and friends!

### WHO ARE WE?

FTD.aero is a highly specialized high tech company supplying aviation industry with flight training solutions worldwide since 2009. Over years we have delivered flight training products and components to hundreds of customers in more than 50 countries on all continents.

Continuous development provides freedom and flexibility in product design and manufacture. Partnership with aviation certified subcontractors, combined with access to knowledge and expertise in various areas creates unique base for top quality and high fidelity devices.
